**Amendments to the Claims**

This listing of the claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (currently amended) A system for storing and retrieving data, comprising:
  2. an identifier including three or more variables for identifying each data stored in said system, wherein one of said at least three or more variables is a location variable.
  1. 2. (original) The system of claim 1, wherein one of said three or more variables is a device identification variable.
  1. 2. 3. (original) The system of claim 2, further includes a timestamp for prioritizing said data.
  1. 2. 4. (original) The system of claim 3, wherein one of said variables may be filled by a wildcard.
  1. 2. 5. (original) The system of claim 4, wherein said system includes a registry for storing said data.
  1. 2. 6. (original) The system of claim 5, wherein said registry is provided in a database structure.
  1. 2. 7. (original) The system of claim 1, wherein said three or more variables includes a device identification variable, an application identification variable and a user identification variable.
  1. 2. 8. (original) The system of claim 7, further including a timestamp for prioritizing data.

1           9. (original) The system of claim 8, wherein one of said variables may be filled by a  
2           wildcard.

1           10. (original) The system of claim 9, wherein said system includes a registry and said  
2           registry includes a database structure for storing said data.

1           11. (currently amended) A registry for storing and retrieving preference data,  
2           comprising:  
3           an identifier including at least three variables for identifying a data stored in said registry,  
4           wherein one of said at least three or more variables is a location variable.

1           12. (original) The registry of claim 11, further comprising a means for providing a  
2           floating value to said at least three variables.

1           13. (original) The registry means of claim 12, further comprising a means for  
2           associating a time stamp to said data.

1           14. (currently amended) A method for storing and retrieving data in a system,  
2           comprising the step of:  
3           identifying each stored data in said system by an identifier including three or more  
4           variables, wherein one of said at least three or more variables is a location variable.

1           15. (original) A method according to claim 14, further comprising the step of storing  
2           data in a registry.

1           16. (original) A method according to claim 15, wherein one of said three or more  
2           variables is a device identification variable.

1           17. (original) A method according to claim 16, further including the step of time  
2           stamping said data for prioritizing said data.

1 18. (original) A method according to claim 17, further including the step of  
2 filling one of said variables with a wildcard.

1 19. (original) A method according to claim 18, further including the step of  
2 deleting one or more data items that has been superseded by a subsequent data having  
3 same identifier but a higher time stamp value.

1 20. (original) A method according to claim 19, wherein said registry is  
2 provided in a database structure.

1 21. (new) A system for storing and retrieving data as in claim 1 wherein said  
2 location comprised the locating a device.
